

YouLead

Youth Learning Entrepreneurship through Digital Serious Game

We are happy to share that the YouLead Compass has been successfully completed and is now available online! https://youlead-erasmus.eu/wp-content/uploads/2025/12/WP2_YouLead-Compass_EN.pdf

The YouLead Compass is a practical guide created within the Erasmus+ YouLead Project, designed to support youth entrepreneurship education—especially for young people with fewer opportunities. It brings together real needs, real experiences, and practical solutions to help youth workers and educators design engaging and inclusive learning activities.

Developed in close collaboration with project partners, youth workers, and young people, the Compass reflects the challenges young people face when exploring entrepreneurship and translates them into clear educational responses and tools.

The guide focuses on:

- Supporting young people to build confidence, skills, and motivation
- Using experiential learning, serious games, and digital tools
- Creating safe, inclusive, and accessible learning environments
- Helping educators choose the right tools for workshops and mentoring

The YouLead Compass is now available on the project website, where you can explore the full guide and use it in your educational and training activities. We invite you to take a look, share it with your networks, and use it as a resource to support young people on their entrepreneurial journeys.
